MU2 Report for OEMR Board Meeting on 6/8/2016

Meaningful Use 2
(aka. 2014 ONC Ambulatory EHR Certification)

Remaining items:
a8   - Clinical decision support:
Visolve is working on this. Will likely undergo certification testing within 2 weeks.
Estimated completion time of 2 weeks.

c1-c3 - Clinical quality measures:
Visolve has completed main coding and Visolve is working on code revisions to get it
into the official OpenEMR codebase. Likely undergo certification testing within 2
weeks. In order to decrease cost of testing, plan to bundle this testing together
with above a8 item. Estimated completion time of 2 weeks.

e2/f2 - Clinical summaries/Immunization information:
Note these 2 items have already passed certification testing. ZH Healthcare is
working on code revisions to get it into the official OpenEMR codebase. Estimated
completion time of 2 weeks.

g2   - Automated measure calculation:
Visolve has begun to test this item in detail and will soon begin to analyze for
solutions to complete the 3 to 4 remaining rules that still need coding. Estimated
completion time of 6 weeks.

g3   - Safety-enhanced design:
ZH Healthcare has offered to help with this item. In process of discussing solution
to this item with ZH and work has not yet started. Estimated completion time of about
2-4 weeks after intiate work on this item.

Budget:
About 7 hours more testing time which is $175 per hour ($1225 total) plus Visolve's
fee of $3900. Will be about $5125 total.
