PROCESS 4.5.2: LABORATORY ORDERS & RESULTS

#	Sten	Observations	Menu options or screen information
#	Preliminary steps: Before using the Diagnostic Lab & Orders function, you need to complete 3 preliminary steps:	Once properly configured the Diagnostic Labs & Orders module is easy to use.	Note: The following Diagnostic Lab & Orders function are available from OpenEMR version 3.1.1.7 onward.
0	 Define Lab service opation(s) either within the clinic or external, with the Address Book Check and adjust default settings related to Lab tests (Procedures) in Administration>Lists Configure your Lab Test structure (See Guide on Laboratory Catalogue Configuration) 	Depending on the configuration, you will be able to record Lab test orders, Test Results, Additional findings, Recommendations, etc. If further configuration is required please consult the CMIS Steering Committee	Please check with your system admin about system version Diagnostic Labs & Orders Configuration Patient Results Batch Results
1	Activating a client / visit A Lab Order/Result must first have an active client and an active visit. The Lab procedure can be processed during or after the visit is closed. The visit must be closed with an admin transaction if no services or products are sold.	This Visit for Ana Anderson: (Outlete) Administrative User Form Administrative Administrative Administrator Patient Encounter New Visit Form This Sheet Procedure Order At the current Visit Page, select the Procedure Order Order option at the upper right corner menu:	Administrative Administrative New Visit Form Tally Sheet Procedure Order
	Typical Lab Order / Test / Result continuum When a lab test is prescribed, some of the following actions usually happen: →	 A Lab test Order is issued to the client Monitor Lab test, which can be performed in-house or at an external lab An expected set of results is received and recorded - manually or digitally Additional data, Recommendations or analysis are recorded 	 In OpenEMR you can (see next rows): Place the Procedure Order Monitor Procedure Orders Record Lab Test results Record additional data (eg. Recommendations or Other Findings)
2	Placing a Procedure Order The Procedure Order form includes the following: Order type: Clicking on field opens Orders page → Ordering provider: Staff who prescribed the lab test Date ordered: Visit date as suggested by default Internal time collected: Date/time of sample collection Priority: High/Normal. Defined in Administration/Lists Status: Pending / Routed / Complete / Cancelled. Default Status when order form is created is "Pending" Patient instructions: free text field	Types of Orders, Results and Recommendations Order Code Description Description Order Code Code Description Order Code Code Code Code Code Code Code Code	Procedure Order for Ana Rose Anderson on 03/06/2010 Ordering Provider: Contexting Provider: EN Opnaecologist Deae Orderene: 2010-05-27 20 08 02 Princity: High States: Pending Patient Instructions: Collect: results in 3 days
	Monitoring Procedure Orders You can review Procedure orders at: •Visit Page: Procedure Orders are associated to visit date •Patient Results Page: If Procedure Orders have been completed, select 'Include Completed' tick box and Refresh the screen	This Visit for Ana Anderson: (Deene) User Form Administrator Procedure Order (Deene) Patient kt: 12 Encounter Id: 835 Date Collected: 2010-627 20.08.00 Date Ordered: 2010-627 Order Priority: high Order Status: pending Patient Instructions: Collect results in 3 days Administrator Patient Encounter	Include Completed Refresh
